

Drive-in Project

A drive-in movie theater is an outdoor cinema where patrons watch films from the comfort of their cars. It typically consists of a large outdoor screen, a projection booth, a concession stand, and a spacious parking area designed for cars. Customers drive in, park their vehicles, and tune their car radios to a specific frequency to hear the movie's audio. Marked out of 50.

	Reference	Instructions
	CHANGES ON SHEET: <i>Sheet 1</i>	
1	Sheet 1	Rename to: Drive-In History
2	Sheet 1	Insert a Footer. • Position: Center • Type: Student number: Your_student_number e.g. Student number: 217123456 • Position right: Current Date Element
3	Cell C1	Set Alignment: Middle & Center
4	Range C4:C17	Format to Currency: (R English - South Africa).
5	Cell D4	Use a function to extract the <i>Decade</i> that the year in A4 belongs to. The <i>Decade</i> is found in the <i>Decades Table</i> on the worksheet. Ensure that the formula will copy correctly.
6	Cell E4	Insert a function to show whether there were more than 1500 Drive-in Theatres open that year. Should be more than 1500 open, show “More” otherwise show how many less than 1500 there were. Ensure that the formula will copy correctly.
7	Cell L4	Use a function(s) to show the <i>Movie Title</i> as in Cell: Q4, ensuring that there are no extra spaces included and that each Word in the Title starts with a Capital Letter. Copy the formula from L4 to L5:L17. Ensure that the formula will copy correctly.

	Reference	Instructions
8	Cell F4	Use a function to extract the Oscar Winning Movie for the <i>Year</i>. The Oscar Winning Movie is found in the <i>Academy Award - Best Picture</i> Table on the worksheet. Only select needed information. Ensure that the formula will copy correctly.
9	Cell G4	Use a function to extract the <i>Genre</i> for the movie in Cell: F4 using the <i>Year</i>. The <i>Genre</i> is found elsewhere on the worksheet. Only select needed information. Ensure that the formula will copy correctly.
10	Range D4:G4	Copy these formulas to the range: D5:G17
11	Cell I12	Use a function to determine: The number of <i>Oscar nominations</i> that the genre in H12 has yielded. Ensure that this formula can be copied correctly Copy the formula in I12 to I13: I16
12	Range H11: I16	Place borders around and inside this range
13	Cell C19	Use a function to determine: How many of the listed years had more than 1500 theatres open. <i>Hint: Use column E.</i>
15	Cell C20	Use a function to determine: The total number of drive-ins that were open from 1980 onwards. Use the range A4:A17 in the calculation.
16	Cell C21	Use a function to determine: The number of Movies with the Drama <i>Genre</i> that won the Oscars for all the listed years (Use the <i>Academy Award – Best Picture</i> table)
17	Cell C22	Use a formula to determine: The percentage of Drive-ins Open in 2010 compared to 1970, by dividing the number of <i>Drive-ins Open</i> in 2010 by the number of <i>Drive-ins Open</i> in 1970.

18	Chart in Range I19:L24	• Change the Chart Type: <i>3-D Clustered Column</i> • Set the Chart Title font: <i>Arial Black</i> • Set Legend: <i>Bottom</i>
	CHANGES ON SHEET: <i>Win vs Nomination</i>	
19	Cell D2	Use a function to determine: The number Academy Awards the <i>Award Winning Movie Title</i> in B2 has won. This information can be found in the <i>Academy Award – Best Picture</i> table on the <i>Drive-In History</i> worksheet. Ensure that the formula will copy correctly.
20	Cell E2	Use to formula to determine: The Actual Awards Won versus the Number of Nominations by dividing the <i>Number of Academy Awards</i> by the <i>Number of Nominations</i>. Ensure that the formula will copy correctly.
21	Range D2:E2	Copy the range D2:E2 to D3:E15
22	Range B1:E15	Sort this range by <i>Number of Nominations</i> , smallest to largest order. Ensure that My data has headers is selected (checked).
